PROFILE

I'm Kevin, I'm a web developer and I'm ok with that.

My current language of choice is Python and I don't hate JavaScript like a lot of people do (in fact I kind of like it but don't tell anyone).

EXPERIENCE

HOOP APRIL 2019 - MAY 2020

Hoop is a start-up providing a marketplace for kids activities providing apps for parents to find and book these activities as well as admin tools for the organisers to publish their activities and view their sales data. I was brought onboard the web team to work on expanding the website which had previously only been used as a marketing site for the apps.

Technologies deployed/used in production:

- Python (Django)
- Celery
- JavaScript (React, Redux, vanilla)
- MySQL
- Elasticsearch
- AWS

POTATO JULY 2012 - APRIL 2019

Potato is a digital agency and as a senior developer I have been involved in a wide variety of projects. this includes in-house project management tools, marketing websites and mobile applications. I've been able to work on various teams and project durations ranging from just myself and a couple of days of development to 10+ people over multiple years.

Technologies deployed/used in production:

- Python (Django)
- JavaScript (React, Redux, vanilla)
- Swift
- Google App Engine
- Google datastore

HOGARTH WORLDWIDE NOVEMBER 2010 - JULY 2012

Hogarth is a marketing implementation agency where I predominantly worked on an internal workflow tool. This was a highly customised version of Django which allowed the tool to be configured (without code changes) for each required workflow.

Technologies deployed/used in production:

- Python (Django)
- JavaScript (vanilla, Backbone)
- Java
- Mustache templating
- Mongo

BEAM.TV MAY 2004 - NOVEMBER 2010

BEAM.TV is an asset management system for the archiving and transferring of TV commercials. During my time at BEAM.TV I progressed through various job roles: systems administrator, senior developer and project manager.

Technologies deployed/used in production:

- PHP
- JavaScript (Prototype and Scriptaculous)
- XML and XSLT
- Oracle 10g
- Linux (Redhat and CentOS)

EDUCATION

UNIVERSITY OF KENT — BSC (HONS) COMPUTER SCIENCE WITH A YEAR IN INDUSTRY, SEPTEMBER 2002 - JUNE 2006
